

TRUMBULL COUNTY BOARD OF DEVELOPMENTAL DISABILITIES

Policy

Section 8.2

PRE-ADMISSION SCREENING & RESIDENT REVIEW (PASRR)

The Omnibus Budget Reconciliation Acts of 1987 and 1990 included requirements that all individuals residing in, or applying for admission to, nursing facilities (NFs) be screened and evaluated in order to determine whether:

- There were indications of:
 - Mental Retardation (MR)
 - Developmental Disabilities (DD)
 - Serious Mental Illness (SMI)
- Individuals were determined to have MR, DD, or SMI.
- Nursing facilities were needed to provide service.
- Additional specialized services were needed.

A portion of this legislation was intended to prohibit NF's from admitting or retaining individuals with MR, DD, or SMI unless they had been screened and determined to be appropriate for NF's.

Per OACB 5123-14-01(D)(2), no one who has indications of developmental disabilities shall move into a nursing facility in Ohio until the Level II evaluation for developmental disabilities determination has been made by DODD.

When the Department of Developmental Disabilities receives a request from the Ohio Department of Medicaid or its designee that an individual has indications of developmental disabilities and is seeking Nursing Facility admission or needs to be determined if they are eligible to continue to receive services in a nursing facility, DODD will assign TCBDD to conduct the Level II evaluation as defined in OAC 5123-14-01. TCBDD shall designate a Service and Support Administrator to manage the evaluation.

Within seven business days of receipt of the referral by DODD, TCBDD shall complete the evaluation as required in OAC 5123-14-01 and submit its recommendations in the form of a written evaluation report to the department via the department's web-based assessment center, regarding whether the individual has developmental disabilities and whether the nursing facility services, and specialized services are required.

DODD shall issue a determination in the form of a written report within two business days of receipt of TCBDD's recommendations and documentation. If DODD determines the individual does not require the level of services provided by a nursing facility,

TCBDD will assist the individual and/or his or her guardian with alternative placement options, services, and resources, as necessary.

Board President

Superintendent
